Chairman

Honorable VICENTE B. VALDEPEÑAS, JR.

Minister of Economic Planning
and
Director-General of the Authority

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Executive Director & Civil Registrar-General

MARCELO M. ORENSE Assistant Executive Director

FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

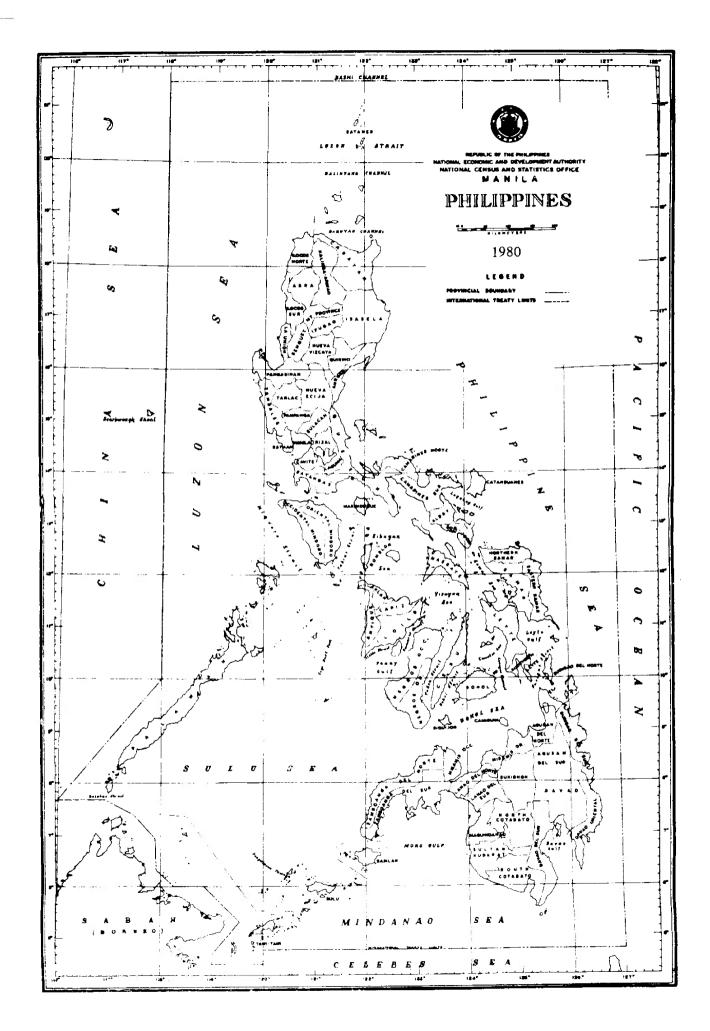

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every censal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Popu	lation	Itame
гани	1241.18.211	1161115

Age Sex

Marital Status

Highest Grade Completed

Literacy

Language/Dialect Spoken in the

Household

Gainful and Non-Gainful Occupation

Major and Minor Industry

Migration

Housing Items

Type of Building
Type of Occupancy

Construction Materials of Roof and Outer

Walls

Year Built

Floor Area of Dwelling Unit

Tenure of Owner-Occupant with Respect

to the Land

Kind of Lighting Facilities
Use and Source of Water Supply

Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I -- POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation:
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
 (2) in mental hospitals;
 (3) in leprosaria or leper colonies; and
 (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months:
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival:
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II - HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

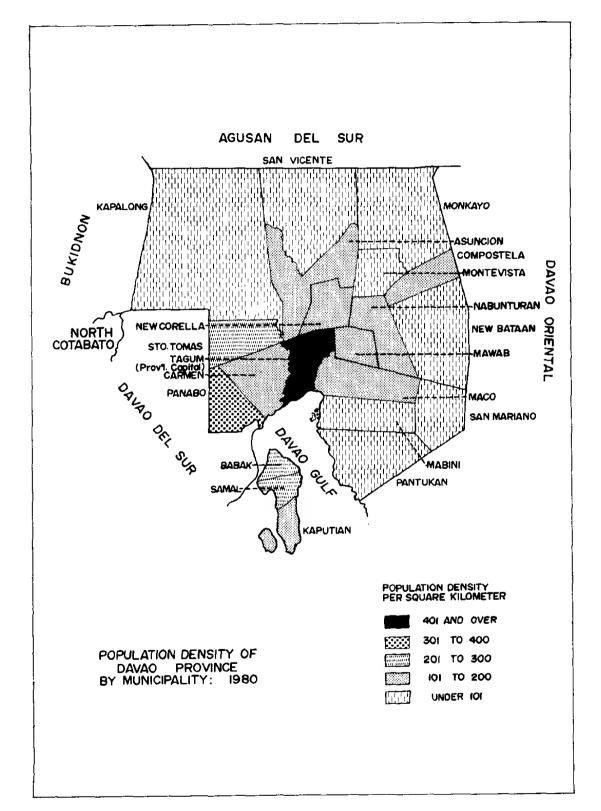

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

Davao: A Brief Analysis

Davao, together with Davao Oriental and Davao del Sur, originally composed the vast province of Davao, then one of the biggest and richest provinces in the Philippines. It was created a separate province on May 8, 1967 and named Davao del Norte. However, it was renamed Davao on June 17, 1972 under Republic Act No. 6430. Situated in the southeastern section of Mindanao, the province is bounded by Agusan del Sur on the north, Bukidnon on the northwest, Davao Gulf on the south, Davao del Sur on the southwest and Davao Oriental on the east and southeast.

The terrain consists of flat, rolling, hilly and mountainous portions evenly located throughout the province. Davao is also surrounded by mountain ranges that protect it from typhoons. One of its peaks, Mount Apo, is the highest mountain in the Philippines. The province is also known for its rich natural resources. Coal is found near the Mayo River and sulphur, almost in a pure state, covers the top of Mount Apo. Pearls and fishes likewise abound off the coasts of the province.

Davao has a land area of 8,129.8 square kilometers, representing 2.71 percent of the total land area of the country.

At the time of its creation Davao had only 13 municipalities. Subsequently, eight other municipalities were created, hence 21 municipalities presently comprise the province with Tagum as the provincial capital.

POPULATION

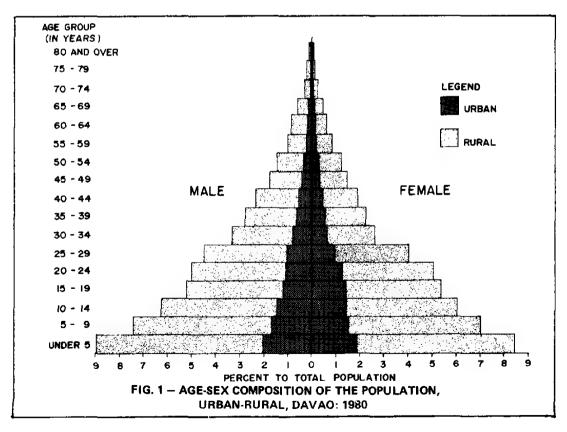

As reported in the 1980 census, Davao had 725,153 inhabitants of which 377,407 were males and 347,746 were females. Population-wise, the province ranked number 21 among the 73 provinces of the country. Its annual geometric growth rate, placed at 4.22 percent, showed a decrease of 1.69 percentage points since May 1, 1975. Its population density, on the other hand, moved up from 72.5 in 1975 to 89.2, or an increase of 16.7 persons per square kilometer within a five-year period.

Davao is still predominantly rural, despite an increase of 5.24 percentage points in the proportion of urban dwellers between 1975 and 1980. More than three-fourths (76.48%) of its total population reside in rural areas while 23.52 percent are in the urban areas. Likewise, a change is observed in the male and female proportions. The proportion of male and female urban residents increased by 2.58 and 2.66 percentage points, respectively. Correspondingly, a decrease in the proportion of male and female rural residents (3.10 and 2.14 percentage points, respectively) is noted.

A comparative breakdown of the population classified according to urban-rural residence is shown below:

TABLE A -- URBAN-RURAL POPULATION BY SEX, DAVAO: 1970, 1975 AND 1980

Area Classification and Sex	1980		19	75	1970	
	Number	Percent	Number	Percent	Number	Percent
Total	725,153	100.00	589,697	100.00	442,543	100.00
Male	377,407	52.04	309,966	52.56	231,340	52.28
Female	347,746	47.96	279,731	47.44	211,203	47.72
Urban	170,526	23.52	107,789	18.28	88,684	20.04
Male	86,071	11.87	54,806	9.29	45,525	10.29
Female	84,455	11.65	52,983	8.99	43,159	9.75
Rural	554,627	<u>76,48</u>	481,908	81.72	353,859	79.96
Male	291,336	40.17	255,160	43.27	185,815	41.99
Female	263,291	36.31	226,748	38.45	168,044	37.97

The sex ratio (number of males for every 100 females) of the province dropped from 110.81 in 1975 to 108.53 in 1980, the males still outnumbering the females. The sex ratio was more pronounced in the rural areas (110.65) than in the urban areas (101.91), both of which were male predominated.

The population pyramid for the rural male and female population tends to follow an expansive profile of the age-sex distribution. A large number of the rural male and female population are under 5 years of age. From this age group to the 80 years old and above, the population (male and female) respectively decrease as each age group grows older, thus a pyramid-like structure can be observed.

AGE COMPOSITION

Davao still has a high proportion of the younger age group (0-14 years) although a downward trend has been observed since 1970. The youth population comprise 44.16 percent of the provincial total, or a slight decrease of 1.80 percentage points between 1975 and 1980, slightly lower than the 1970-1975 decline of 2.06 percentage points. Considered as the productive age group, the 15-64 age bracket on the other hand, maintains an upward trend. After rising 2.02 percentage points between 1970 and 1975, it further increased by 1.42 percentage points to 53.75 percent. The older age group (65 years and over) constitute a small proportion of the provincial population (2.09%), representing a slight increase of 0.38 percentage point within the five-year period. Of the total urban population, 43.04 percent are below 15 years old, 54.74 percent are in the productive age group and only 2.22 percent, 65 years old and over. Comparatively, 44.51 percent of the rural residents are 0-14 years of age; 53.44 percent, 15-64 and 2.05 percent, 65 and over.

TABLE B ~ AGE COMPOSITION OF THE POPULATION, DAVAO: 1970, 1975 AND 1980

Age Composition	1980		19	75	1970	
	Number	Percent	Number	Percent	Number	Percent
Total	725,153	100.00	<u>589,697</u>	100.00	442,543	100.00
0 – 14 years	320,238	44.16	271,007	45.96	212,512	48.02
15 – 64 years 65 years and over	389,738 15,177	53.75 2.09	308,615 10,075	52.33 1.71	222,644 7,387	50.31 1.67

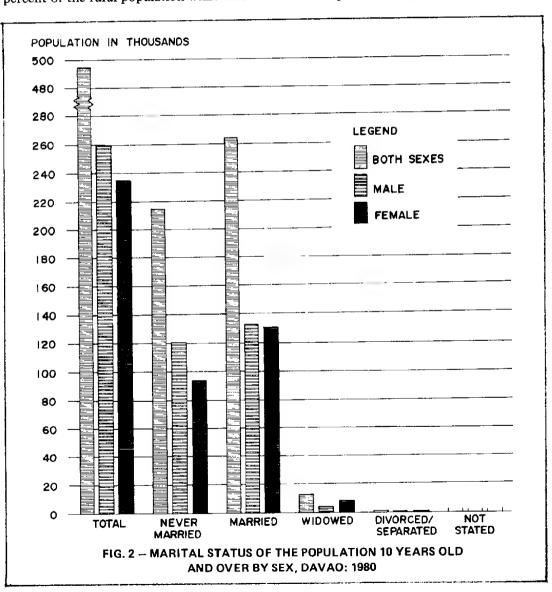

The median age of the population is older by 1 year, from 16 years in 1975 to 17 years in 1980.

With an increased percentage of persons in the productive ages, the dependency ratio (number of dependents for every 100 persons in the productive age group) dropped from 98.77 in 1970 to 91.08 in 1975 and moved down to 86.06 in 1980. The urban dependency ratio, at 82.68, was markedly lower than the rural ratio of 87.13 (Table 3).

MARITAL STATUS

In 1970 and 1975, never married persons comprised a higher proportion of the population 10 years old and over (48.75% and 49.10%, respectively). Suddenly declining by 5.72 percentage points, the proportion of never married persons trailed behind married persons, now comprising 53.59 percent, or 5.34 percentage points more than the 1975 figure. Meanwhile, slight increases were noted in the widowed (0.29 percentage point) and the divorced or separated (0.08 percentage point) categories. Likewise, persons who did not reveal their marital status increased slightly from 0.04 to 0.05 percent in 1980.

More than one-half of the rural populace were married (54.24%), compared to 51.52 percent of the urban dwellers. Consequently, never married persons constituted 42.67 percent of the rural population while their urban counterparts made up 45.64 percent.

Of the total male population 10 years old and over, 46.43 percent were single, 6.28 percentage points lower than in 1975. In contrast, the proportion of married males increased from 45.50 percent to 51.60 percent, and those widowed and divorced or separated, to 1.64 percent and 0.28 percent, respectively. Among the females, 40.02 percent were never married, following a considerable decrease of 4.98 percentage points. Married females, on the other hand, rose from 51.38 percent to 55.78 percent. Similarly, the widowed and the divorced or separated, respectively, increased by 0.43 and 0.12 percentage point (Table 4).

The succeeding table shows the classification of the population by sex and marital status:

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, DAVAO: 1970, 1975 AND 1980

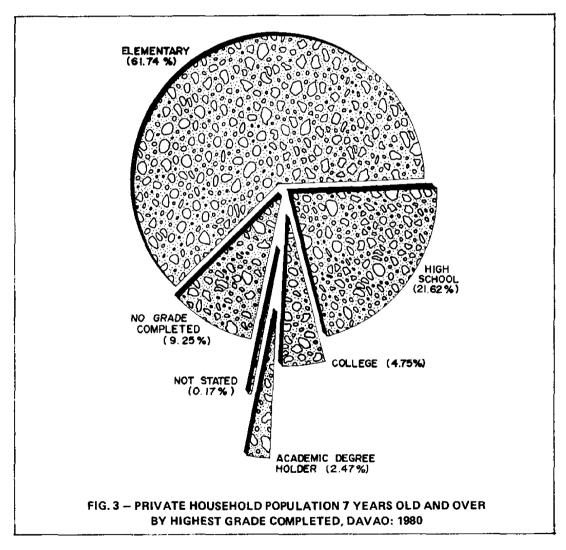

Sex and	19	1980		1975		1970	
Marital Status	Number	Percent	Number	Percent	Number	Percent	
Both Sexes	494,525	100.00	397,631	100.00	291,857	100.00	
Never married	214,518	43.38	195,249	49.10	142,278	48.75	
Married	265,009	53.59	191,851	48.25	140,178	48.03	
Widowed	13,026	2.63	9,292	2.34	7,856	2.69	
Divorced/separated	1,704	0.35	1,091	0.27	1,148	0.39	
Not stated	268	0.05	148	0.04	397	0.14

Not stated	134	0.06	63	0.03	174	0.12	

HIGHEST GRADE COMPLETED

Persons with elementary education still remained at a high level, although their proportion from 64.53 percent in 1975 to 61.74 percent of the private household population 7 years old and over. On the other hand, those who reached the secondary and college levels increased respectively by 4.52 and 1.52 percentage points. Academic degree holders likewise rose by 0.77 percentage point, accounting for 2.47 percent. It is also noted that the

proportion of persons who had no formal schooling as well as those who did not disclose their educational attainment correspondingly decreased to 9.25 percent and 0.17 percent, respectively.

Of those who had elementary training, 32.40 percent graduated from the sixth or seventh grade. More than one-third (34.58%) did not go beyond the first to third grade; 18.89 percent attained the fourth grade and 14.13 percent, the fifth grade. Among those with secondary education, 69.72 percent reached anywhere from the first to third year, while 30.28 percent graduated from fourth year. Most of the college undergraduates (85.94%) finished the lower collegiate years (1st-3rd year) and only 14.06 percent completed the fourth or higher year (Table 5).

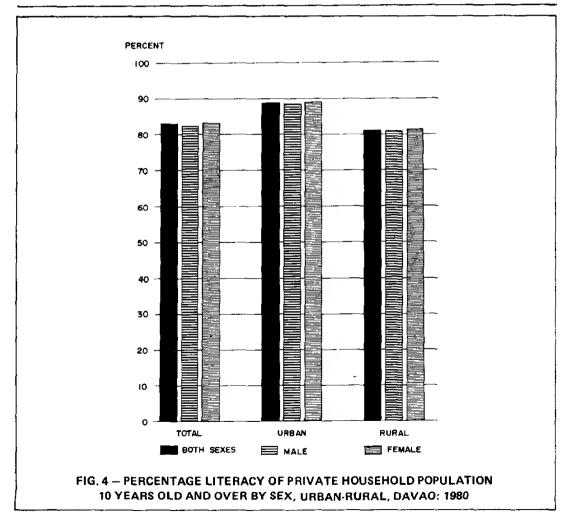

The distribution of the private household population 7 years old and over according to highest grade completed in the last two censal years is shown in Table D.

A BRIEF ANALYSIS

TABLE D ~ PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, DAVAO: 1975 AND 1980

Highest Grade Completed	19	80	1975		
	Number	Percent	Number	Percent	
Total	551,975	100.00	451,400	100.00	
No grade completed	51,064	9.25	53,781	11.91	
Elementary	340,770	61.74	291,285	64.53	
High school	119,318	21.62	77,201	17.10	
College	26,231	4.75	14,559	3.23	
Academic degree holder	13,630	2.47	7,693	1.70	
Not stated	962	0.17	6,881	1.53	

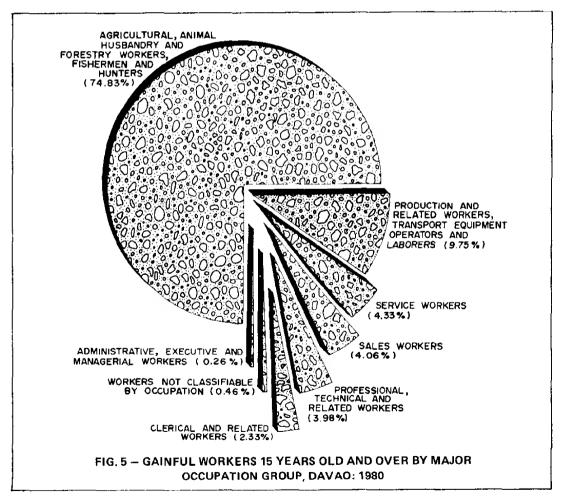

LITERACY

The literacy rate for the private household population 10 years old and over slightly increased from 82.92 percent in 1970 to 82.97 percent in 1980. Urban areas had a higher rate of literacy (88.86%) than rural areas (81.13%) which may be attributed to the accessibility of more schools in the former areas.

Females turned out more literates than males both in urban and rural areas. Of the urban population, 88.58 percent were male literates compared to 89.13 percent for their female partners. For the rural males, 80.87 percent were literates, lower than the rural females' literacy rate of 81.42 percent.

LANGUAGE OR DIALECT

Out of 44 languages and dialects reported spoken in the province, Cebuano remains as the major dialect. Of the 129,996 private households, 105,538 or 81.19 percent speak Cebuano. Only 5.70 percent speak Hiligaynon (Ilongo); 2.98 percent, Ilocano; 1.68 percent, Mandaya and 1.63 percent, Davaweño. Both urban and rural areas are predominated by Cebuano-speaking households, 82.83 percent and 80.69 percent, respectively.

GAINFUL OCCUPATION

Gainful workers comprise 52.17 percent of the private household population 15 years old and over; the remaining 47.83 percent are in non-gainful activities.

The number of gainful workers has increased to 209,409 from the 1975 report of 174,947 and 137,564 in 1970. Agricultural, animal husbandry and forestry workers, fishermen and hunters make up the biggest group of gainful workers (74.83%), despite a decrease of 2.14 percentage points. Production and related workers, transport equipment operators and laborers remain second in rank, but constitute only 9.75 percent. Service workers, now third in rank, increased by 0.53 percentage point to 4.33 percent, followed by sales workers with 4.06 percent. Professional, technical and related workers, at 3.98 percent, likewise gained 1.20 percentage points. While clerical and related workers slightly increased from 2.23 to 2.33 percent, administrative, executive and managerial workers decreased from 0.54 to 0.26 percent. Workers not classifiable by occupation account for 0.46 percent (Table 8).

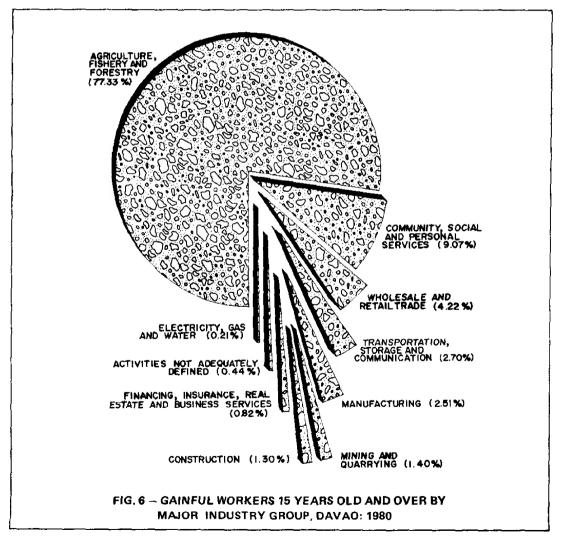

The urban areas turned out a slightly higher proportion of gainful workers (52.26%) compared to the rural areas (52.14%), brought about by a higher proportion of housekeepers in the latter than in the former areas. As expected, the rural areas produced more agricultural, animal husbandry and forestry workers, fishermen and hunters (83.47%) compared to the urban areas with only 47.42 percent.

TABLE E ~ GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, DAVAO: 1970, 1975 AND 1980

Major Occupation	1980		1975		1970	
Group	Number	Percent	Number	Percent	Number	Percent
Total	209,409	100.00	174,947	100.00	137,564	100.00
Professional, technical and related workers	8,337	3.98	4,872	2.78	5,779	4.20
Administrative, executive and managerial workers	555	0.26	941	0.54	798	0.58
Clerical and related workers	4,870	2.33	3,896	2.23	2,292	1.66
Sales workers	8,502	4.06	7,130	4.08	5,254	3.82
Service workers	9,060	4.33	6,6 4 6	3.80	5,636	4.10
Agricultural, animal husbandry and forestry workers, fisher men and hunters	156,693	74.83	134,657	76.97	96,486	70.14
Production and related workers transport equipment operators and laborers	, 20,427	9.75	15,837	9.05	19,914	14.48
Workers not classifiable by occupation	965	0.46	968	0.55	1,405	1.02

INDUSTRY

Agriculture, fishery and forestry, the dominant industry group in Davao, provide means of livelihood to 77.33 percent of the total gainful workers 15 years old and over. Most of the agricultural workers derive their income from agricultural crop production (93.81%). Trailing far behind are workers in fishery (3.48%) and forestry (1.77%). Community, social and personal services, the second biggest industry group, employ 9.07 percent of the gainful workers with personal and household services (37.58%), education services (28.66%), and public administration and defense (20.31%) serving as the workers' principal concentrations. Wholesale and retail trade rank third with 4.22 percent, followed by transportation, storage and communication with 2.70 percent. Manufacturing contributes 2.51 percent; mining and quarrying, 1.40 percent; construction, 1.30 percent and financing, insurance, real estate and business services, 0.82 percent. Gainful workers in electricity, gas and water comprise only 0.21 percent and those in activities not adequately defined, 0.44 percent (Table 9).

MIGRATION

Out of 595,346 persons 5 years old and over, 87.42 percent were residents of the same municipality where they had lived on May 1, 1975; 5.46 percent moved to another municipality within the province while 7.04 percent moved across provincial boundaries. Only a small percentage were residing in foreign countries (0.08%). The males outnumbered the females in two of these three migratory movements. In the inter-municipality migration within the province, 2.84 percent were males and 2.62 percent, females. Among migrants from other provinces, 3.71 percent were males and 3.33 percent, females while among migrants from other countries, the two sexes shared equal proportions (0.04%).

TYPE OF BUILDING

Of the 129,996 households in the province, 91.68 percent occupy single houses. The rest live in duplexes (2.90%), apartments/accesorias/condominiums/row houses (2.90%), improvised structures such as barong-barong (1.81%), commercial/industrial/agricultural buildings (0.66%), and in other types of structures (0.05%).

More than three-fourths (77.45%) of the households residing in single houses are in the rural areas while 22.55 percent are in the urban areas. Similarly, a greater proportion of households living in apartment/accesoria/condominium/row house/etc., improvised struc-

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, DAVAO: 1970 AND 1980

47.44	19	80	1970		
Type of Building	Number	Percent	Number	Percent	
Total	129,996	100.00	73,349	100.00	
Single house	119,185	91.68	66,259	90.33	
Duplex	3,763	2.90	1,853	2.53	
Apartment/accesoria/condo-					
minium/row house/etc.	3,772	2.90	1,393	1.90	
Improvised (barong-barong)	2,348	1.81	2,275	3.10	
Commercial/industrial/agri-					
cultural	861	0.66	1,548	2.11	
Other housing unit: natural

mitory, etc.	17	0.01	~		
Institutional (hospital, convent,					
school dormitory, etc.).	4	-	21	0.03	
Other collective living quarters					
(military camp, etc.)	15	0.01	~		

tures and in hotel, lodging house, dormitory, etc. are in the rural areas (90.14%, 89.91% and 76.47%, respectively). Occupants of other housing units such as natural shelter, boat, etc. (74.19%) and other collective living quarters such as military camp, etc. (66.67%) are likewise mostly rural dwellers. On the other hand, more urban households are occupying duplex (51.58%) as well as commercial/industrial/agricultural buildings (74.22%). Institutional buildings such as hospital, convent, school dormitory, etc., are entirely occupied by households in the urban areas (Table 1).

Table F presents the housing conditions of households in Davao during the past 10 years. It is noted that in 1970, 90.33 percent of the 73,349 households lived in single houses and 3.10 percent, in improvised structures. Ten years after the latter declined to 1.81 percent of the total households, thus increasing the proportion of single house dwellers to 91.68 percent.

TYPE OF OCCUPANCY

Table 1 also shows that 79.23 percent of the total households are owners of the dwelling units they occupy. The rest of the households are either tenants/lessees (9.13%), subtenants/sublessees (0.41%) or rent-free occupants (11.23%).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

More than half (50.77%) of the households in the province reside in dwelling units constructed with roofs of galvanized iron/aluminum while 32.93 percent occupy units with roofs of cogon or nipa. The remaining 16.30 percent dwell in units with roofs of makeshift or salvaged materials (2.52%), other materials such as anahaw, etc. (13.62%) and tile, concrete, brick or stone and asbestos (0.52%). Of the urban households, 65.77 percent occupy dwelling units with roofs of galvanized iron/aluminum and 24.92 percent, of cogon or nipa. Rural households in units constructed with roofs of galvanized iron/aluminum constitute 46.26 percent; of cogon or nipa, 35.34 percent; and of other materials such as anahaw, 15.11 percent.

By type of construction materials of outer walls, 59.37 percent of the households reside in dwelling units built with walls of wood or plywood; 18.67 percent, in units with walls of bamboo or sawali and 9.29 percent, of mixed tile, concrete, brick, stone and wood or plywood. A considerable number occupy dwelling units with walls of other materials (3.84%), of makeshift or salvaged materials (3.40%), of cogon or nipa (3.36%) and of tile, concrete, brick or stone (1.32%). Few households dwell in units constructed with outer walls of galvanized iron or aluminum and asbestos (0.75%). Most of the households in both the urban (62.36%) and rural (58.47%) areas occupy dwelling units with walls of wood or plywood. Households in dwelling units built with walls of bamboo or sawali comprise only 10.96 percent in the urban areas and 21.00 percent in the rural areas. However, 16.33 percent of the urban households live in units with walls of mixed tile, concrete, brick, stone and wood or plywood compared to 7.17 percent of their rural counterparts (Table 2).

YEAR BUILT

Majority (52.71%) of the total households are occupants of structures built in 1976-1980; 25.75 percent, during 1971-1975; 15.50 percent, 1961-1970; and 4.98 percent, 1951-1960. Only 0.80 percent live in buildings built during 1942-1950 and 0.26 percent, before World War II (Table 2).

FLOOR AREA OF DWELLING UNIT

Most of the households (65.06%) in the province occupy dwelling units with floor area less than 30 square meters. One-fourth (25.03%) live in 30-49 square-meter dwelling units; 5.28 percent dwell in 50-69 square-meter units and 2.61 percent, 70-99 square meters. Only 1.22 percent have spacious dwelling units from 100-149 square meters and 0.80 percent, 150 square meters and over (Table 3).

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 102,997 households that own their dwelling units, 64.37 percent also own the land where the structures are erected. The rest are distributed as follows: 11.16 percent, lessee or sublessee; 11.30 percent, farm lessee or agricultural tenant of landowner; 4.71 percent, other legal tenure and 8.46 percent, no tenure such as squatter, etc. (Table 4).

SOURCE AND USE OF WATER SUPPLY

Most of the households in the province depend on the dug well than on any other source of water supply whether for drinking (26.22%), for kitchen use (28.53%), or for washing clothes (24.00%). More than one-fifth (23.37%) use water from spring for drinking; 22.93 percent, tubed or piped deep well; 11.54 percent, faucet, community water system; 8.02 percent, tubed or piped shallow well; 6.90 percent, rain; and 1.02 percent, lake, river, stream, etc. Nearly the same proportions of households use water from these sources for kitchen use: 23.09 percent, spring; 21.30 percent, tubed or piped deep well; 10.61 percent, faucet, community water system; 7.96 percent, tubed or piped shallow well; 5.20 percent, rain; and 3.31 percent, lake, river, stream, etc. For washing clothes, however, more households (23.35%) rely on lake, river, stream, etc.; 18.31 percent use water from tubed or piped deep well; 14.97 percent, spring; 9.12 percent, faucet, community water system; 6.82 percent, tubed or piped shallow well and 3.43 percent, rain (Table 5).

KIND OF LIGHTING FACILITIES

Kerosene is still the most widely used type of lighting facility in the province with 78.64 percent of the total households using it, compared to 88.99 percent in 1970. Only 17.64 percent use electricity; 2.61 percent, liquefied petroleum gas (LPG); 0.08 percent, oil and 1.03 percent, other kinds such as candle or wax. Of the urban households, a great proportion (62.36%) use kerosene; 36.51 percent use electricity and only 0.13 percent, oil and other kinds. Most rural dwellers (83.54%) likewise use kerosene for lighting; 11.96 percent rely on electricity while only 0.09 percent use oil and 1.32 percent, other kinds. Liquefied petroleum gas which was not used in 1970, is now used in the urban (1.00%) as well as in the rural areas (3.09%).

COOKING FUEL

Wood or charcoal is widely used for cooking by Davao residents. Despite a considerable decrease of 6.90 percentage points from the 1970 proportion, 88.57 percent of the total households still use wood or charcoal. Meanwhile, 7.33 percent use kerosene, an increase of 5.00 percentage points from the 1970 figure. As in the past decade, very few households use electricity (1.13%), liquefied petroleum gas (2.25%) and other kinds of cooking fuel

(0.72%). In both the urban and rural areas, the predominant use of wood or charcoal is observed -84.25 percent for the former and 89.87 percent for the latter (Table 8).

TOILET FACILITIES

Water-sealed with other depository is the most common type of toilet facility in the province with 30.92 percent of the total households using it. A little more than one-fourth (25.14%) use the closed pit (antipolo, etc.); 21.43 percent, water-sealed with sewer or septic tank; 15.38 percent, open pit and 0.48 percent, other types such as pail system, etc. Of the total households, 6.65 percent lack toilet facilities.

Urban households have better toilet facilities than their rural counterparts. Of the urban households, 37.51 percent use the water-sealed toilet with other depository; 36.04 percent, water-sealed with sewer or septic tank; 15.55 percent, closed pit; 7.10 percent, open pit and 0.21 percent, other types. Among the rural households, 28.93 percent use water-sealed toilet with other depository; 28.03 percent, closed pit; 17.87 percent, open pit; 17.04 percent, water-sealed with sewer or septic tank and 0.56 percent, other types. Households without toilet facilities constitute 3.59 percent in the urban and 7.57 percent in the rural areas (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Nearly three-fourths (74.74%) of the total households in Davao have radios; 4.52 percent own television sets and 5.72 percent, refrigerators or freezers. Comparatively, a higher proportion of the urban than the rural households own these appliances. Of the urban households, 77.19 percent own radios; 10.61 percent, television sets; and 12.37 percent; refrigerators or freezers. Among the rural households, 74.00 percent have radios; 2.69 percent, television sets; and 3.72 percent, refrigerators or freezers (Table 9).
